

## Locating a Map

There are a number of web sites available that allow users to access maps, driving directions, and travel guides. The following exercise will walk you through how to use the MapQuest web site.

1. From a MPL computer, click **Programs** from the **Start menu**.
  - A *submenu* will appear.
2. Click **Internet Explorer**.
  - The MPL web site home page [<http://www.mpl.org>] loads in the Internet Explorer browser
3. On the address toolbar, click in white the box, which displays the current web address (it will turn a blue-purplish color).
4. Type **www.mapquest.com** and press the **Enter** key.
  - The MapQuest web site loads.
5. Click in the **Address or Intersection** box (notice a flashing cursor displays in the box).
6. Type your home address or address of your neighborhood library (*note*: include spaces just as though you were typing the address on an envelope).
7. Click in the remaining boxes and fill in the information specified (*note*: you can also press the **tab** key to go from one box to the next).
8. Once you have completed the form, click on the **Search** button.
  - A page loads with the map of the specified address.

(*Note: This exercise continues on the next page*)

Maps - Enter as much as you know

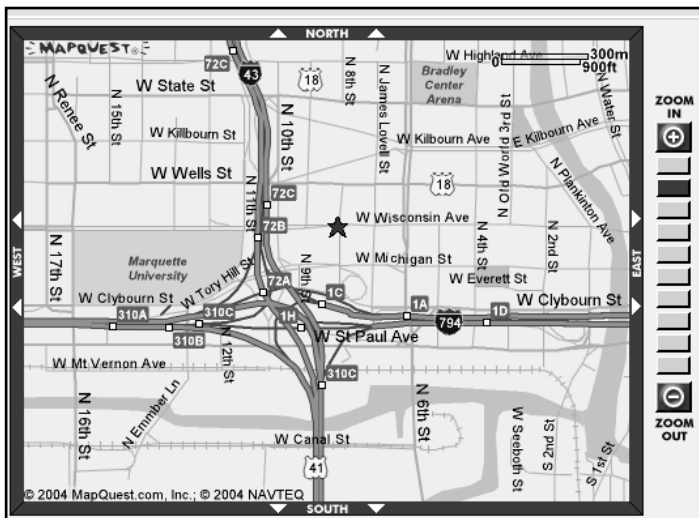

Place Name (optional) e.g., Food or Schools

Look up Category or Airport

Address or Intersection

City  State  ZIP Code

• [Outside U.S. & Canada](#)

- ⦿ Click on various zooming options to pan in and out.
- ⦿ You may also click on a specific portion of the map to zoom in, re-center, or move the location.
- ⦿ To pan in a different direction, click on either North, East, South, or West.
- ⦿ Fill in the blanks under **Get Directions To Above Location** link to access driving directions.
